NCSC Advisory

Zimbra: Collaboration

CVE-2026-73570

18th, August 2026

STATUS: TLP:CLEAR

Recipients can spread this to the world, there is no limit on disclosure. Sources may use TLP:CLEAR when information carries minimal or no foreseeable risk of misuse, in accordance with applicable rules and procedures for public release. Subject to standard copyright rules, TLP:CLEAR information may be shared without restriction.

For more information on the Traffic Light Protocol, see <https://www.first.org/tlp/>. Please treat this document in accordance with the TLP assigned.

Description

CVE ID: CVE-2026-73570**Published:** 2026-08-13**Vendor:** Zimbra**Product:** Collaboration**CVSS Score¹:** 8.9

Products Affected

Product	Version
Collaboration	0 < 10.1.20

Impact

A remote code execution vulnerability exists in Zimbra Collaboration (ZCS) before 10.1.20 when the optional zimbra-snmp package is installed and SNMP notifications are enabled. Due to improper sanitization of untrusted input during SNMP notification processing, an unauthenticated attacker can send specially crafted SMTP requests that may result in execution of arbitrary operating system commands as the Zimbra user.

Common Weakness Enumeration (CWE)²: CWE-78 Improper Neutralization of Special Elements used in an OS Command ('OS Command Injection')

Known Exploited Vulnerability (KEV) catalog³: No

Used by Ransomware Operators: N/A

Recommendations

The NCSC strongly recommends installing updates for vulnerable systems with the highest priority, after thorough testing. Affected organisations should review the latest release notes and install the relevant updates from Zimbra.
